**Brightly** is a library based Adafruit's [CircuitPython](#) Python implementation with functions to generate simple LED patterns and animations. It is designed to work with the [Brightly Code Generator](#) to create an easy to use drag-and-drop coding interface for Neopixels on CircuitPython capable boards.

# CHAPTER 1

---

## Dependencies

---

This library depends on:

- Adafruit CircuitPython
- Adafruit CircuitPython NeoPixel

The current brightly.mpy library is compatible with CircuitPython 4

Please ensure all dependencies are available on the CircuitPython filesystem. This is easily achieved by downloading the Adafruit library and driver bundle

## CHAPTER 2

---

### Usage Example

---

See examples/main.py

# CHAPTER 3

---

## Contributing

---

Contributions are welcome! Please read the [Code of Conduct](#) before contributing to help this project stay welcoming.

# CHAPTER 4

---

## Table of Contents

---

### 4.1 Simple test

Ensure your device works with this simple test.

Listing 1: examples/main.py

```
1 #Auto generated CircuitPython Code
2 import board
3 import neopixel
4 import time
5 import brightly
6 numpix = 14
7
8 strip = neopixel.NeoPixel(board.D1, numpix, brightness=0.15, auto_write=False)
9 brightly = brightly.Brightly(strip, numpix)
10
11 while True:
12     brightly.wipe(0.05, 1, (255, 0, 0))
13     brightly.wipe(0.05, -1, (0, 0, 255))
14     brightly.twinkle(8, [(255, 0, 0), (0, 255, 0), (0, 0, 255)], 5)
15     brightly.scroll_morse("hi there", (255, 0, 0))
